

Srinjoy Tambuli

ECE Student | Full-Stack & IoT Developer | Embedded Systems Enthusiast

 srinjoyt06@gmail.com | <https://github.com/Srinjoy3002> |  [Hooghly, India]

PROFESSIONAL SUMMARY

Motivated Electronics & Communication Engineering student with hands-on experience in full-stack web development, IoT systems, and embedded programming. Skilled in building real-world applications from hardware sensor integration to web dashboards. Passionate about solving practical problems with technology and continuously expanding capabilities through AI-assisted development.

TECHNICAL SKILLS

HTML	CSS	JavaScript	Python
C++	MongoDB	Firebase RTDB	IoT
Embedded Systems	Arduino	REST APIs	AI-Assisted Dev

PROJECTS

AgriNova WebApp 3.0

2026 – Present

Full-Stack Web Application | [github.com/](https://github.com/Srinjoy3002)

- Agriculture-focused web platform built with HTML, CSS, JavaScript and real-time database
- Integrated Firebase RTDB for live data sync and MongoDB for persistent storage
- Designed responsive UI with focus on usability for agricultural use cases

Dairy Billing System

2026

Desktop/Web Application

- Reads raw data from milk analyzer hardware via serial/IoT interface
- Calculates rates, generates daily & weekly bills automatically
- Reduces manual billing errors and saves hours of daily data entry

Sales Order & Task Management App

2025

Full-Stack Business Application

- Allows customers to place orders and automatically assigns tasks to company sales staff
- Built with real-time database backend for instant task distribution
- Streamlines internal sales operations and reduces communication overhead

Hardware / Embedded Projects

Ongoing

IoT & Embedded Systems

- Various Arduino/microcontroller projects integrating sensors with web dashboards
- Experience with sensor data acquisition, processing, and real-time display

EDUCATION

B.Tech – Electronics & Communication Engineering (ECE)

2023 – Present

[Academy of Technology], [Adisaptogram]

- Relevant coursework: Embedded Systems, Signal Processing, Circuit Design, Programming
- Strong foundational knowledge bridging hardware and software development

FREELANCE SERVICES OFFERED

- Full-stack web applications (HTML/CSS/JS + Firebase/MongoDB backend)
- IoT dashboards with real-time data visualization
- Python automation, scripting, and data processing tools
- Embedded system prototyping (Arduino, ESP32, sensor integration)
- Custom billing, inventory, and business management applications

Available for part-time and freelance work • Open to remote collaboration
